PROFESSIONAL EXPERIENCE

- Yardi Software India Pvt. Ltd. — Software Engineer (Data & Backend)** *Feb 2024 – Present*
- Build and maintain SQL Server objects (stored procedures, functions, views, triggers) in T-SQL powering core product features for enterprise clients.
 - Optimize complex queries using execution plans, indexing, and SQL Server Profiler, improving performance across large production databases.
 - Investigate and resolve production data issues via root-cause analysis, data validation, and reconciliation to keep business data accurate and reliable.
 - Contribute to Virtuoso, Yardi's AI initiative, preparing and validating datasets and writing SQL to support AI-driven features and data quality.
 - Automate recurring database processes and monitor SQL Agent jobs, cutting manual effort and catching failures before they reach users.
 - Partner with development and product teams on Agile deployments and releases, delivering reusable scripts with rollback support.

PROJECTS

- Marketplace Analytics** | SQL, dbt, Python | github.com/vedashri-27/marketplace-analytics
- Built an end-to-end analytics project on a simulated marketplace: conversion funnel, channel ROAS/CAC, cohort retention, A/B-test significance, and an interactive dashboard.
- E-Commerce Sales Dashboard** | Power BI, DAX | github.com/vedashri-27/powerbi-ecommerce-dashboard
- Designed a single-page sales dashboard (revenue, profit, AOV, category and payment mix) with DAX measures and quarter-level slicers for self-serve analysis.
- SkyCargo AI Desk** | Python, FastAPI | github.com/vedashri-27/skycargo-ai-desk
- Developed an AI customer-support agent for air-freight queries using an LLM agent framework over a SQLite backend, exposing it through a FastAPI service.

ACHIEVEMENTS

- Earned SQL (Advanced) certification on HackerRank, validating complex querying and query-optimization skills.
- Selected to contribute to Virtuoso, Yardi's AI initiative, alongside core data and backend responsibilities.
- Independently designed and open-sourced three end-to-end analytics and AI projects (SQL + dbt, Power BI, LLM agent).
- Pursuing an MBA in Operations while working full-time, strengthening business and product analysis skills.
